# Digital Literacy Project Report

**Name: Pratyush Jaiswal**

**Registration Number: 25BAI11065**

**Course: CSE0001 Digital Literacy**

**Program: B.Tech Computer Science and Engineering(AI/ML)**

**University: VIT Bhopal University**

**Submitted To: Dr. KANNAN**

**Date: 29/03/2026**

---

## Introduction

Digital literacy refers to the ability to use digital devices, internet services, and online platforms in a safe and effective manner. In today's academic environment, students depend on digital tools for learning, communication, and project work.

The main aim of this project was to develop practical knowledge of digital platforms such as GitHub, coding websites, Google Forms, and professional communication methods. The project also focused on understanding cyber safety and responsible use of online resources.

All the tasks were completed step by step and organized in a GitHub repository. This report explains each task along with the work performed and learning outcomes.

---

## Task 1 – Infographic Creation

In this task, a digital infographic was created using Canva to explain the concept of digital literacy. The infographic included topics such as basic digital tools, safe internet usage, and responsible online behaviour.

A suitable template was selected in Canva, and the content was added in a simple and clear format. After completing the design, the infographic was downloaded and uploaded to the GitHub repository.

This task helped in understanding how to present information visually using digital tools.

---

Task 2 – Digital Portfolio

In this task, profiles were created on different online platforms such as GitHub, LinkedIn, and Kaggle. These platforms are important for building a professional online presence.

Basic details such as education and course information were added to the profiles. Screenshots of all profiles were taken and uploaded to the repository as proof of work.

This task helped in understanding how digital platforms can be used for learning and future career development.

Hi there
I'm Pratyush Jaiswal B.Tech Computer Science Engineering Student at VIT Bhopal University 1st Year
About Me I am a passionate and curious student currently learning programming and web development. I aim to build strong technical skills and work on real-world projects to grow as a developer.
Skills Python (Basics) HTML, CSS, JavaScript (Frontend Development),DSA beginner Data Entry Operations
Goals Improve coding and problem-solving skills Build and upload projects on GitHub Gain practical experience through internships Become a succesful tech expert

Task 3 – Coding Platform and Google Form

This task involved using a coding platform and creating a Google Form. An account was created on Codechef, and basic problems were solved to understand how coding platforms work.

A Google Form was created with multiple questions related to digital literacy. The form included different types of questions and was connected to a response sheet.

Screenshots of both the coding platform and the Google Form were uploaded to the repository. This task helped in learning online collaboration and data collection tools.

## Print Squares

Write a program to output the squares (using multiplication) of numbers from 1 to 5 on separate lines.

[**Note:** Please print in the same format as given below. There are single spaces between hyphen(-) and digits.]

### Output Format

```
1 - 1
2 - 4
3 - 9
4 - 16
5 - 25
```

Did you like the problem?

1284 users found this helpful

### Your Output

```
1 - 1
2 - 4
3 - 9
4 - 16
5 - 25
```

You got it right!

# DIGITAL LITERACY QUIZ

The purpose of this quiz is to check your understanding of the subject

1. What do you understand by Digital Literacy? *

- Ability to use digital devices effectively and safely
- Ability to code software
- Ability to play online games
- Ability to repair computers

2. Which of the following is a strong password? *

- 123456
- password
- PratYUSH@2026!
- abcdef

Untitled form All changes saved in Drive Published

Questions Responses 2 Settings Total points: 5

3. What is phishing? *

- A type of antivirus software
- A method to catch fish using the internet
- A cyber attack to steal personal information
- A way to improve internet speed

4. Which device is used to input data into a computer?

- Monitor
- Printer
- Keyboard
- Speaker

5. What is Digital Footprint? Short answer

Task 4 – Email and Social Media Etiquette

In this task, two professional emails were written to understand formal communication. One email was written for assignment submission, and the other was related to internship inquiry.

A checklist of social media do’s and don’ts was also prepared to understand responsible online behaviour.

This task helped in improving communication skills and understanding proper usage of social media platforms.

Subject: Request for Extension on Assignment Submission

Dear Sir/Ma'am,

I hope you are doing well.

I am writing to request a short extension for submitting my assignment due to unforeseen circumstances that affected my ability to complete it on time. I want to ensure that I submit work that reflects my best effort.

I kindly request an extension of 2 days. I apologize for any inconvenience caused and appreciate for your understanding.

Thank you for your consideration.

Kind regards,

Pratyush Jaiswal

Subject: Application for Summer Internship Opportunity

Dear Sir/Ma'am,

I hope you are doing well.

My name is Pratyush Jaiswal, and I am currently pursuing a Bachelor of Technology in Computer Science & Engineering with a specialization in Artificial Intelligence and Machine Learning. I am writing to express my interest in a summer internship opportunity at your organization.

I am eager to gain practical experience and apply my skills in areas such as machine learning, data analysis, and software development. I am highly motivated to learn, contribute to real-world projects, and grow under the guidance of experienced professionals.

I have attached my resume for your consideration. I would be grateful for the opportunity to contribute to your team and further develop my skills.

Thank you for your time and consideration. I look forward to hearing from you.

Kind regards,

Pratyush Jaiswal

Task 5 – Cybercrime Case Study

In this task, a case study on online UPI fraud was prepared. The case explained how attackers trick users into making payments through fake requests or messages.

A prevention checklist was also created, including safety measures such as verifying payment requests, avoiding unknown links, and not sharing personal details.

This task helped in understanding cyber risks and how to stay safe while using digital platforms.

# Case Study: Digital Payment Deception via UPI

**Overview of the Crime**

Online UPI fraud is a widespread form of cybercrime where bad actors manipulate users into sending funds by using fraudulent payment prompts or messages. The frequency of these attacks is rising in tandem with the global shift toward digital payment applications.

**Modus Operandi**

In a standard scenario, a target is contacted via phone or text by someone impersonating a bank official or a payment service representative. The fraud typically unfolds through several deceptive tactics:

- **The "Receive Money" Trap:** Attackers issue a UPI "collect" request, convincing the user they must approve it to receive a payment.
- **Lack of Technical Awareness:** Many individuals do not realize that approving such a request authorizes a withdrawal, resulting in money being drained from their account rather than deposited.
- **Malicious Links and QR Codes:** Criminals frequently distribute fraudulent QR codes or links, instructing targets to scan or click them.
- **Immediate Financial Loss:** Once a user provides their credentials or confirms the transaction, the funds are instantly lost.

**Conclusion and Prevention**

This case highlights how a lack of familiarity with digital payment mechanics can lead to significant financial damage. To prevent such losses, users must always double-check the legitimacy of payment requests and fully understand how UPI transactions operate before taking any action.

---

# Conclusion

This project helped in developing practical knowledge of digital tools and platforms. It improved skills such as creating content, managing online profiles, writing professional emails, and understanding cyber safety.

The use of GitHub for organizing all tasks also helped in learning how to present work in a structured manner. Overall, this project was useful in building essential digital skills required for students.
